

Privacy Notice – NHS Digital

Plain English explanation

NHS Digital is the secure haven for NHS patient data, a single secure repository where data collected from all branches of the NHS is processed. NHS Digital provides reports on the performance of the NHS, statistical information, audits and patient outcomes (<https://digital.nhs.uk/data-and-information>). Examples include; A/E and outpatient waiting times, the numbers of staff in the NHS, percentage target achievements, payments to GPs etc and more specific targeted data collections and reports such as the Female Genital Mutilation, general practice appointments data and English National Diabetes Audits. GPs are required by the Health and Social Care Act to provide NHS Digital with information when instructed. This is a legal obligation which overrides any patient wishes. These instructions are called “Directions”. More information on the directions placed on GPs can be found at <https://digital.nhs.uk/article/8059/NHS-England-Directions-> and www.nhsdatasharing.info.

NHS England has been directed by the government to establish and operate the OpenSAFELY COVID-19 Service and the OpenSAFELY Data Analytics Service. These services provide a secure environment that supports research, clinical audit, service evaluation and health surveillance for COVID-19 and other purposes.

Each GP practice remains the controller of its own GP patient data but is required to let approved users run queries on pseudonymised patient data. This means identifiers are removed and replaced with a pseudonym.

Only approved users are allowed to run these queries, and they will not be able to access information that directly or indirectly identifies individuals.

Patients who do not wish for their data to be used as part of this process can register a [type 1 opt out](#) with their GP.

Here you can find [additional information about OpenSAFELY](#).
